

# Your future in energy starts here.

**Future Energy** × **Jobs Community.**

## What are the Career Maps?

The Future Energy Career Maps showcase real career pathways in construction, advanced manufacturing, and related fields across Southwestern Pennsylvania.

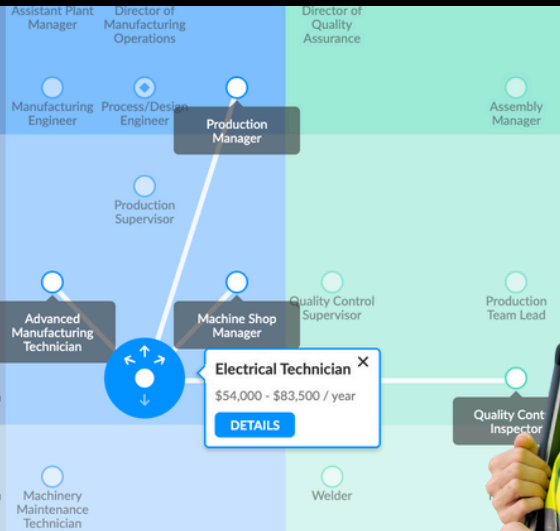

You can chart a career pathway after taking a skills assessment or by matching your interests, view what skills you'll need, see what the jobs pay, and explore where to find training near you. It's free, easy to use, and built with input from local employers, schools, and community partners.

- Explore the Career Maps.
- Share them with a friend, student, or coworker.
- Find training or connect with a workforce partner near you.

## Future Energy Career Maps

Your guide to discovering **real jobs** and next steps in Pennsylvania's **growing energy economy.**

**FutureEnergyJobs.org**

**Take charge of your career.**

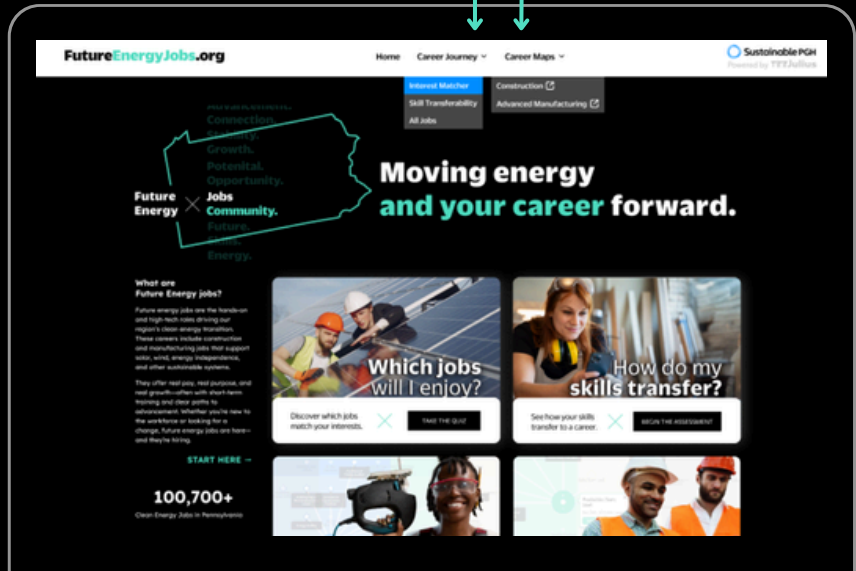

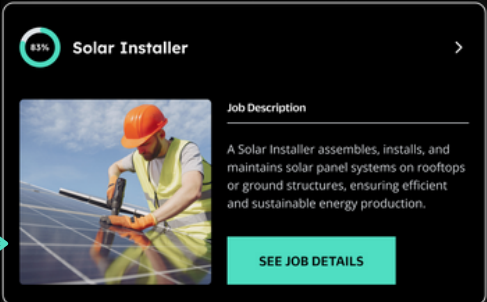

# Getting started.

- 1 Go Online: Visit **FutureEnergyJobs.org**
- 2 Try the **Interest Matcher** to see which roles fit your work style. Or take the **Skills Transferability Assessment** to find jobs that match your experience.
- 3 Choose Your Map: Construction or Advanced Manufacturing
- 4 Explore **Career Pathways**: Click a job tile to see details about pay, skills, and training.

# Explore & learn.

When you click on a job, you'll see:

- What it pays
- Skills and training needed
- Where to get training or apply
- Next steps or related jobs

**Tip:** Use the Interest Matcher to see which jobs fit your work style. Use the Skill Transferability Assessment to see how your current experience connects to new opportunities.

# Try it yourself.

## Try these quick challenges:

- ▶▶ Find a job that looks exciting — what kind of work would you do each day?
- ▶▶ Explore a role that matches something you already enjoy — teamwork, technology, or building things.
- ▶▶ Click through a few connected jobs to see how someone can grow over time.
- ▶▶ Try the Interest Matcher and see what surprises you!

## For educators or counselors

Use the maps in classes, workshops, or career discussions to spark ideas about the future job possibilities. Show students how classroom skills connect to real jobs in the energy industry. Host a map walk-through or include it in career readiness activities.

## Discussion Starters

(for groups or classrooms)

- What kinds of jobs caught your attention?
- Which skills do you already have that show up on the map?
- What's one new skill you'd like to learn?
- How could these maps help you plan your next step?
